Leak Testing Control System

The System is made up of a control unit designed for managing Leak Testing process of Containers, Human Machine Interfacing, and pneumatic actuators. It can be equipped with one or more Testing Chamber under Vacuum or Pressure. Leak Testing process starts when the Cycle Start button is pressed. Test result (Conforming or Non-Conforming) is displayed on the HMI screen.

Key benefits

- Low investment cost.
- Easy management.
- Low energy consumption.
- Very low maintenance.
- Alarm display
